

Week of August 25, 2014

Capital Project. An update on the capital project is as follows:

Sitework:

The parking lot outside the tech wing demo was completed and the concrete encased electric conduit was installed. The parking lot was complete up to the asphalt binder. Teachers will be able to park there starting Tuesday, September 2. The final top layer of asphalt will be put on next summer. This will allow the parking lot to be in good shape at the end of next summer when all work is complete.

Asbestos Abatement:

The asbestos abatement targeted for this summer was completed. This included the tech wing and miscellaneous areas in and near the kitchen. Clean air reports were received and the areas can be occupied.

Room 207:

The temporary location for the tech program was completed. New data and electric outlets were installed and the room is ready for computer install.
