

## **Week of September 15, 2014**

**Capital Project.** An update on the capital project work is as follows:

### *Sitework:*

The concrete bleacher pads were formed and poured. The sitework contractor continued with the new asphalt walks. The electric trench for the field lighting continued. The sprinkler was installed at the southeast corner of the baseball field.

### *Technology Wing (217B, 219, 221, 223A, 223):*

The framing for the new walls started. The concrete masonry walls and tile in the corridor were demolished and the new walls were formed.
