

## **Week of September 22, 2014**

**Capital Project.** An update on the capital project work is as follows:

### *Sitework:*

All asphalt walks are complete except the southeast walk to the baseball field and at the grandstand. The electric trench for the field lighting is completed. The sprinkler installation was completed.

### *Technology Wing (217B, 219, 221, 223A, 223):*

The framing for the new walls continued. Hollow metal window frames were set. The utility trenches were all cut into the existing concrete floor slab. Door frames were delivered and will be installed next week. Electric rough-in started. This included re-positioning the electric panels and pulling new wire.
